A G R E E A B L E to what the Proposals promised, a Volume of my late worthy friend Dr. *Boyce's* Compositions for the Church ventures into the World, which it is humbly hoped will in all respects answer the Expectations of those who have honoured it with their generous Patronage and support.

The several pieces made choice of are calculated for general use: many of them are not only well known, but have even received distinguished marks of Royal Favour, and Universal Approbation.

If the present undertaking should meet with a favourable reception, a second Volume will probably take place in the course of a few Years; as there still remain ample Materials for a work, in no respect dissimilar to the present.

I have carefully adhered to whatever was intended by the Author, and endeavoured to approve myself a faithful Editor of this his work.
