GRAND SONATA IN B FLAT (Nº3.)

FOR FLUTE & PIANOFORTE.

Dedicated to
CHRISTOPHER WELCH ESQ.

Composed by
HAMILTON CLARKE.

Op: 221.

MODERATO E GRAZIOSO.

FLUTE.

PIANO.

The musical score is written for Flute and Piano. It begins with a treble clef, a key signature of one flat (B-flat), and a common time signature (C). The tempo and mood are indicated as *MODERATO E GRAZIOSO*. The score is divided into four systems, each with a Flute staff and a Piano grand staff (treble and bass clefs). The first system starts with a piano (*p*) dynamic. The second system includes a *Cres.* (Crescendo) marking. The third system includes a *mf* (mezzo-forte) marking. The fourth system includes a *f* (forte) marking. The score concludes with a final cadence in the piano part.

p *mf* *f* *mf* *mf* *p* *mf* *Dim.* *p* *Dim.* *p* *Cres.* *f* *Cres.* *f* *p* *f*

The musical score is presented in five systems, each with a single treble clef staff and a grand staff (treble and bass clefs). The key signature is B-flat major (two flats). The first system features a *ff* dynamic in the treble and *p* and *f* dynamics in the grand staff. The second system includes a *Rall.* marking and *mf* dynamics. The third system is marked *Tempo.* and includes *Cres.* markings. The fourth system features a *f* dynamic. The fifth system includes a *p* dynamic. The score contains various musical notations including slurs, ties, and dynamic markings.

The musical score on page 5 consists of six systems of music. Each system features a vocal line on a single staff and a piano accompaniment on a grand staff (treble and bass clefs). The key signature is B-flat major, and the time signature is 4/4. Dynamics are indicated by 'f' (forte) and 'p' (piano). The score includes first and second endings, marked '1st' and '2nd' respectively. The piano accompaniment is characterized by dense chordal textures and rhythmic patterns, often using triplets and sixteenth notes. The vocal line features melodic phrases with various ornaments and phrasing marks.

First system of musical notation. It consists of three staves: a single treble clef staff at the top, and a grand staff (treble and bass clefs) below. The key signature has two flats (B-flat and E-flat). The top staff contains a melodic line with slurs and a dynamic marking of *pp*. The grand staff contains a complex accompaniment with many beamed notes and a dynamic marking of *pp*.

Second system of musical notation, continuing the piece. It features the same three-staff layout. The melodic line in the top staff shows some chromatic movement and a dynamic marking of *pp*. The accompaniment in the grand staff continues with dense textures.

Third system of musical notation. The top staff begins with a dynamic marking of *mf* and ends with *f*. The grand staff begins with *mf* and ends with *f*. The accompaniment features a prominent bass line with some rests.

Fourth system of musical notation. The top staff continues the melodic development. The grand staff accompaniment shows some changes in texture, with more open intervals in the bass line.

Fifth system of musical notation. The top staff starts with a dynamic marking of *p* and moves to *mf*. The grand staff starts with *p*. The system concludes with a final melodic phrase in the top staff and a sustained bass line in the grand staff.

Dim. *p*

First system of musical notation. It consists of a vocal line in the upper staff and a piano accompaniment in the lower staff. The piano part features a complex texture with many sixteenth notes and slurs. A dynamic marking of *pp* is present in the right-hand piano part.

Second system of musical notation. The vocal line continues with a melodic line. The piano accompaniment maintains its intricate sixteenth-note pattern. A dynamic marking of *p* is visible in the vocal line.

Third system of musical notation. The piano accompaniment is particularly dense with sixteenth-note runs. A dynamic marking of *sempre pp* is written across the system.

Fourth system of musical notation. The vocal line has a dynamic marking of *p*. The piano accompaniment continues with its characteristic sixteenth-note texture.

Fifth system of musical notation. The piano accompaniment features a dynamic marking of *f* in the right-hand part. The system concludes with a final cadence in both parts.

The musical score is arranged in six systems. Each system contains a vocal line (top staff) and a piano accompaniment (bottom two staves). The key signature is B-flat major. The score includes various dynamics such as *f*, *p*, *mf*, and *pp*, and performance instructions like *rall*, *Tempo.*, and *Cres.*. The piano part features complex chordal textures and arpeggiated figures.

Grand Sonata in Bb.

Detailed description: This page of a musical score is for a Grand Sonata in B-flat major. It features a piano and grand staff. The piano part (top staff) begins with a melodic line marked 'Cres.' and 'f'. The grand staff (middle and bottom staves) provides harmonic support with chords and textures. Dynamics range from piano (p) to fortissimo (ff). A 'Tranquillo' marking is present in the middle section. The score concludes with a double bar line and repeat signs.

Grand Sonata in B \flat .

This page of a musical score for a Grand Sonata in B-flat features six systems of music. Each system consists of a single melodic line and a grand staff (treble and bass clefs). The notation includes various dynamics such as *mf*, *p*, *f*, and *ppp*, along with performance markings like *Cres* and *p/p*. The music is characterized by flowing melodic lines, often with slurs, and complex harmonic textures in the piano accompaniment, including dense chordal passages and rhythmic patterns. The key signature is B-flat major, and the time signature is 4/4.

The first system of the Grand Sonata in Bb. It consists of a single melodic line in the upper staff and a piano accompaniment in the lower staff. The upper staff begins with a piano (*p*) dynamic and features a melodic line with slurs and accents. The piano accompaniment starts with a piano (*p*) dynamic and includes chords and moving lines. A dynamic shift to forte (*f*) occurs in the second measure of the upper staff.

The second system of the Grand Sonata in Bb. It continues the melodic and piano parts. The upper staff starts with a piano (*p*) dynamic and includes a *Cres.* (Crescendo) marking. The piano accompaniment also begins with a piano (*p*) dynamic and features a *Cres.* marking. The system concludes with a dynamic shift to forte (*f*) in the upper staff.

The third system of the Grand Sonata in Bb. The upper staff begins with a forte (*f*) dynamic and includes a *Dim.* (Diminuendo) marking. The piano accompaniment also starts with a forte (*f*) dynamic and includes a *Dim.* marking. The system ends with a dynamic shift to piano (*p*) in the upper staff.

The fourth system of the Grand Sonata in Bb. The upper staff begins with a piano (*p*) dynamic. The piano accompaniment starts with a piano (*p*) dynamic and includes a *pp* (pianissimo) marking. The system concludes with a dynamic shift to piano (*p*) in the upper staff.

The fifth system of the Grand Sonata in Bb. The upper staff begins with a mezzo-forte (*mf*) dynamic and includes a *p* (piano) marking. The piano accompaniment starts with a mezzo-forte (*mf*) dynamic and includes a *pp* (pianissimo) marking. The system concludes with a dynamic shift to piano (*p*) in the upper staff.

This page of a musical score for a Grand Sonata in B-flat features a single melodic line and a piano accompaniment. The score is divided into four systems, each with a single treble clef staff and a grand staff (treble and bass clefs). The key signature is B-flat major, and the time signature is 4/4. The first system begins with a forte (*f*) dynamic. The piano accompaniment consists of chords and moving lines, with a *ppp* dynamic marking in the second measure. The second system features a *f* dynamic in the piano part. The third system includes *p* and *ppp* dynamics. The fourth system features a *f* dynamic in the piano part. The score concludes with a final cadence in the piano part.

The musical score is arranged in seven systems. Each system contains a vocal line and a piano accompaniment. The piano accompaniment is written in two staves, with the upper staff in treble clef and the lower staff in bass clef. The key signature is B-flat major (two flats). The score includes various dynamic markings: *Cres.* (Crescendo), *ff* (fortissimo), *p* (piano), and *mf* (mezzo-forte). There are also slurs and phrasing marks throughout the piece.

The musical score is written in B-flat major and 4/4 time. It consists of six systems of music, each with a vocal line and a piano accompaniment. The dynamics are as follows:

- System 1: *ff* (piano), *f* (piano)
- System 2: *p* (piano), *f* (piano)
- System 3: *f* (piano), *p* (piano)
- System 4: *Dim.* (piano)
- System 5: *p* (piano)
- System 6: *Dim.* (piano), *pp* (piano), *p* (piano)

This page of a musical score, page 24, features a grand staff with three systems. Each system consists of a single treble clef staff at the top and a grand staff (treble and bass clefs) below. The key signature is B-flat major (two flats). The first system shows a piano introduction with a steady eighth-note accompaniment in the bass and a melodic line in the treble. The second system contains the first main section, marked *mf*, with dynamic markings *f* and *p*. The third system contains the second main section, marked *mf*, with dynamic markings *p* and *f*. The score includes various musical notations such as slurs, ties, and dynamic markings.

This musical score page, numbered 25, contains six systems of musical notation. Each system consists of a single treble clef staff and a grand staff (treble and bass clefs). The music is written in a key signature of two flats (B-flat and E-flat) and a common time signature (C). The dynamics and performance instructions are as follows:

- System 1:** Treble clef staff begins with *p* *Cres.* and ends with *f*. Grand staff begins with *p* *Cres.* and ends with *f*.
- System 2:** Treble clef staff begins with *p*. Grand staff begins with *p*.
- System 3:** Treble clef staff begins with *p*. Grand staff begins with *p*.
- System 4:** Treble clef staff begins with *p*. Grand staff begins with *p*.
- System 5:** Treble clef staff begins with *pp*. Grand staff begins with *pp*.
- System 6:** Treble clef staff begins with *mf*. Grand staff begins with *mf*, followed by *f*, and ends with *p*.

The musical score is written in B-flat major and consists of six systems. Each system contains a vocal line and a piano accompaniment. The dynamics are as follows:

- System 1: Vocal *p*, Piano *pp*. Includes a *Cres* (Crescendo) marking.
- System 2: Vocal *f*, Piano *f* and *ff*. Includes a *p* marking at the end.
- System 3: Vocal *p*, Piano *p*.
- System 4: Vocal *f*, Piano *f* and *p*.
- System 5: Vocal *p*, Piano *pp*.

This page of a musical score for a Grand Sonata in B-flat features six systems of music. Each system consists of a vocal line and a piano accompaniment. The piano part is written in a grand staff with treble and bass clefs. The vocal line is in a single staff with a treble clef. The key signature is B-flat major, and the time signature is 4/4. The score includes dynamic markings such as *pp* (pianissimo) and *p* (piano). The piano accompaniment features a steady eighth-note bass line and a more melodic treble line with various ornaments and slurs. The vocal line consists of a series of notes, some with slurs, and rests. The overall texture is light and lyrical.

The musical score is arranged in six systems. Each system contains a vocal line (top staff) and a piano accompaniment (bottom two staves). The key signature is B-flat major, indicated by two flats (B-flat and E-flat). The first system shows a vocal line with a melodic line and a piano accompaniment with chords and moving lines. The second system includes 'Cres.' markings in both the vocal and piano parts. The third system continues the melodic development. The fourth system features a 'ff' (fortissimo) dynamic marking in both parts. The fifth system shows the vocal line continuing with a melodic line. The sixth system concludes the page with a double bar line and a final chord in the piano part.

RUDALL, CARTE, & CO.'S CONCERT FLUTES.

a Rudall, Carte and Co.'s Cylinder Flute, with Parabola Head Joint, Carte and Boehm's Systems Combined (1867 Patent).

This Instrument is an improvement upon B 2, in which some of the difficulties of the Boehm System were removed. It combines the advantages without the drawbacks of the F natural of B 1 with those of the F sharp of B 2. It has also the extra D with all the fingers off, which greatly facilitates execution.

Price, in Cocoa Wood or Ebonite, with Silver Keys, or entirely of Silver, in Fitted Case - - £29 8 0

b 2 Rudall, Carte and Co.'s Cylinder Flute, with Parabola Head Joint, Carte's 1851 Patent.

The object of this was to facilitate the fingering of the Cylinder Flute. At the Great Exhibition of 1851, a Prize Medal was awarded for it as "an Improved Boehm Flute". The fingering is easier than that of the Boehm or of the Old System. It is, at the same time, a smaller departure from the latter.

Price, in Cocoa Wood or Ebonite, with Silver Keys, or entirely of Silver, in Fitted Case - - £29 8 0

d 2 Rudall, Carte and Co.'s Cylinder Flute, with Parabola Head Joint, Improved Old System, Radcliff's Model.

This has the nearest approach in fingering to the Old Eight-Keyed Flute, consistent with the modern arrangement of the holes. The chief changes are that C natural is made with the first finger of the left hand, and that the B flat and long F keys act somewhat differently. There are slight differences also in the fingering of some of the upper notes.

Price, in Cocoa Wood or Ebonite, with Silver Keys, or entirely of Silver, in Fitted Case - - £29 8 0

d 1 Rudall, Carte and Co.'s Cylinder Flute, with Parabola Head Joint, Old System.

This is fingered exactly like the Old Eight-Keyed Flute, with the exception of one or two of the upper notes. It is constructed in the same style as the other improved Flutes, with the Cylinder Bore, covered holes, etc. As it is impossible when this fingering is retained to put all the holes in their absolutely correct positions, some traces of the inherent defects of the Old Flute are still to be found in it.

Price, in Cocoa Wood or Ebonite, with Silver Keys, or entirely of Silver, in Fitted Case - - £29 8 0

b 1 Rudall, Carte and Co.'s Cylinder Flute, with Parabola Head Joint, Boehm's System.

This is the earliest established form of the modern Flute. It was patented in England and France by Messrs. RUDALL & ROSE, as this firm was then styled, in 1847. It is made with either an open or shut G key. The open key is the original form and is generally preferred. The shut one has been made to accommodate players on the Old Flute, from which this system is the most removed in fingering.

Price, in Cocoa Wood or Ebonite, with Silver Keys, or entirely of Silver, in Fitted Case - - £29 8 0

Ditto ditto in Cocoa Wood, with German Silver Keys, in Fitted Case - - 18 18 0

c Rudall, Carte and Co.'s Cylinder Flute, with Parabola Head Joint, Boehm's System, Rockstro's Model.

The fingering of this is the same as that of the last, with the exception of an extra F sharp key between the E and F natural holes, to avoid the veiled F sharp made with the second finger of the right hand. The largest holes were first adopted on this model. An extra D, a shake for high E and F #, and an extra B lever may be added.

Price in Cocoa Wood or Ebonite, with Silver Keys, or entirely of Silver, in Fitted Case - - £29 8 0

j Cylinder Flute, Improved Old System, Radcliff's Model, Simple Form, in Cocoa Wood, with Silver Keys - 15 15 0

k 1 Cylinder Flute, with Parabola Head Joint, Old System, all covered holes, in Cocoa Wood, with G. S. Keys - 11 11 0

l Eight-Keyed Flute, of Cocoa Wood, with German Silver Keys, in Fitted Case - - 4 4 0

m Eight-Keyed Flute, of Cocoa Wood, with Silver Keys, in Fitted Case - - 7 7 0

SOME PARTICULARS

RESPECTING THE

STRUCTURE OF THE FLUTES

MANUFACTURED BY

Messrs. RUDALL, CARTE, & CO.,

23, BERNERS STREET, LONDON, W.

SOME explanation of the Flutes manufactured by Messrs. Rudall, Carte, and Co., may be useful to those who have no opportunity of seeing and examining them together.

There are two classes of Flutes; those with the Conical, and those with the Cylindrical Bore. Up to the year 1847 all Flutes were made with the Conical Bore, excepting the Fife, which has now gone out of use.

The Military Flutes are still made conical, and so are the Ordinary Flutes with from one to eight keys. In the Conical Flutes the head or top joint into which the performer blows has a cylindrical bore, and in the body and foot joints the bore becomes gradually smaller towards the end of the instrument. In the Cylinder Flutes, on the contrary, the body and foot on which the keys are, is cylindrical, and the head joint tapers towards the top. The cone, in this case, is not a straight taper, but is slightly curved, forming a section of a parabolic curve. In the Conical Flutes there were many different bores employed, some large, some small, and varying in numberless particulars. It was from the manufacture of their Eight-Keyed Flutes that Messrs. Rudall and Rose, the predecessors of the present firm, first became celebrated as Flute Makers. The Old Conical Flute was distinguished for its sweet tone combined with considerable power, and it was a remarkably popular instrument in England. At the present day, when we compare it with those now used, it is difficult to account for the enthusiasm which it formerly inspired. Among the serious defects in it we may refer to the fact that the six holes covered by the first, second, and third fingers of each hand, had to be placed where they could be reached conveniently, and that, in consequence, their correct size and position had to be sacrificed, with the necessary results of incorrect tuning, and inequality in the tone of the different notes. The absence of a proper hole for $C\sharp$, too, necessitated the use of an artificial note, *i.e.*, a $C\sharp$ made to sound flat by placing some of the fingers on the lower holes. The muffled note thus produced was a remnant of the old one-keyed German Flute on which many of the notes were produced in this faulty way. The notes, again, were not properly vented. The necessity of having the hole below the one giving the sound open, in order to make the tone free, not being then recognised.

The Fifes formerly used in the army were made with a Cylindrical Bore throughout, but it was found that larger Flutes could not be made in this way, and the Fife itself, years ago, gave place to small conical Flutes and Piccolos. It is curious that the Fife, which gave way to these conical small Flutes, should have contained in it the germ of that bore which, eventually, was to carry all before it. The modern Flute, as has before been stated, is a cylinder with a parabolic head joint.

With the Cylinder bore, which was patented by this firm in 1847 for England and France, and is now in universal use, were introduced other improvements of vast importance. Great efforts had been made immediately before this to remove some of the glaring defects of the instrument. Attempts had been made to facilitate the fingering, and above all, to place the holes in their true places. It was only with the Cylinder, however, that the modern ideas were really developed and established, and that the great principle was realised that the holes must be put in their really correct positions first, and the means of covering them must be found afterwards.

The primary cause of the great success of the modern Flute is, that in consequence of the holes being in their theoretically correct positions, the tuning is, practically speaking, perfect, and the notes equal in quality and volume. With this happy union of theory and practice, have been joined the singular beauty and variety of tone of the Cylinder, and the great facilities offered by the new systems of fingering. Combining as it does all these advantages, it cannot be a matter of surprise that the modern form of the instrument should have taken such a firm hold of the whole Flute-playing world.

The Cylinder Flutes are made with several systems of fingering, but with the exception of that on the Old System, which retains to a certain extent some of the defects of the old flute, the tone and tuning in all of them may be considered equally perfect. The different systems of fingering are described under their separate headings. The bodies of the Flutes are chiefly made of Silver, Cocoa Wood, Ebonite, or Gold. Which material is selected is purely a matter of taste, as much so as in the case of wines, for each has its peculiar qualities. The Cylinder Flutes were first made of Silver, the tone of which is remarkably sweet and delicate. One of its peculiarities is the ease with which the sound is produced. This is especially apparent when contrasted with the old Conical Bore Flute, on which much skill was always requisite to produce at all a soft tone which was up to pitch, and was not feeble. Silver Flutes have to be played with a looser lip than either those of Cocoa Wood or Ebonite, and this has led many people to think them better suited to people who do not play much, than those made of the two latter materials, as a firm lip is only to be kept up by practice. Cocus wood, which is very much used, is the hardest wood there is. Its durability, and fitness generally for the purpose, have caused it to be so much used in the manufacture of Flutes, Clarionets, and other instruments, that it is seldom met with in other forms. The tone which it produces is rich and powerful, and this is combined with a rounded quality at the soft, thoroughly characteristic of the Flute. The Ebonite, a preparation of India Rubber, which has been used for some years in the manufacture of Flutes, is in some respects very similar to the Cocoa Wood. It has more resistance than Silver, but hardly so much as Cocoa. The tone seems to have a slightly softened character quite peculiar to this material, which is very much admired by many. The sound is, perhaps, not so marked as that of the Cocoa. Gold, as a material for Flutes, has several distinctive peculiarities which are very important. The tone is delicate, liquid, and sympathetic in a high degree, and this goes hand in hand with much more resistance and greater richness than is found in the silver. Its remarkable qualities are, no doubt, due to the great density of the metal, to the closeness to each other of the particles which constitute it; this, no doubt, greatly influences the vibration.

There have been several theories put forward on the subject of the size of the holes, but it is now generally recognised by the Musical Profession, as the result of practical experience, that they should not be too large. One idea was that, as by opening a hole the tube is, practically speaking, temporarily cut off at that point, the hole should be made as large as possible, so as to produce the effect of cutting off thoroughly. Experience has shown, however, that this is undesirable, as the tone becomes wild and unmanageable. Another theory was that the instrument was in effect a set of open diapason Pandean Pipes combined in one, and that the holes should therefore become smaller the nearer they were to the embouchure. It was lost sight of, however, that as the bore remained the same, the Pandean Pipe theory must fall to the ground. It would be necessary to have a separate Flute, with a different bore for each note, to carry it out.

When these Flutes were first introduced they were made with what are called the small holes; since then, the large and medium sizes have been introduced. When the medium holes are used, it is found desirable to increase the size of the three lowest holes, but in order to preserve the balance they are not made too large. The late Mr. Clinton carried the size of these holes to an extreme, but they have not become popular. Practical experience must, after all, be the sure guide in these matters, and this has undoubtedly shown that, though the increase made in the size of the holes was a great stride in Flute making, it does not do to carry it too far; there may perhaps be a gain of loudness close at hand, but there is, undoubtedly, a loss of quality and carrying power.
