C H A P T E R I.

Of Music in General.

“MUSIC consists in a succession of pleasing sounds, with reference to a peculiar internal sense implanted in us by the great *author* of nature: considered as a *science*, it teacheth us the just disposition and true relation of these sounds; and as an art, it enables us to express them with facility and advantage. The tones of music differ from sounds in general; because they vary from each other by fixed intervals, and are measured by certain proportions of time. — There is indeed in good speaking, a regularity to be observed, which hath some resemblance to this art, and to the orator we frequently apply the epithet Musical. But the inflections of the voice, in speech, are more minute and variable, slide as it were by insensible degrees, and cannot easily be limited by rule; whereas the gradations of musical sounds are exactly ascertained, and may be referred to an uniform standard.

Music naturally divides itself into MELODY and HARMONY: MELODY is the agreeable effect which ariseth from the succession of single sounds.—HARMONY is the pleasing union of several sounds at the same time. *Modulation* consists, in rightly disposing, and connecting, either the melody of a single part, or the harmony of various parts.—The two PRIMARY and ESSENTIAL qualities of musical sounds are, relative ACUTENESS or GRAVITY, and PROPORTIONATE DURATION.—The first property we may remark is, their relative *acuteness* or *gravity*. Bodies of unequal *size*, or *length*, or *tension*, emit sounds differing in this respect. And they are said to be acute in proportion to the smallness, or shortness of the sounding object, or its greater degree of tension\*. Thus in a set of regular tuned bells, the *smallest* gives the sound we denominate most acute, and the *largest* that which is said to be most grave, and the different intervals between them, are respectively different degrees of acuteness or gravity.”—Human voices differ in this respect, *viz.* a

\* Philosophy hath fully proved that all sounds are conveyed to the ear by means of vibrations, and that acuteness or gravity depends upon the greater or the less number of vibrations, communicated in a given time by any particular object.

MAN'S voice is graver than a woman's, and when the voice moves from a graver to an acuter sound, it is said to ascend.—“Instead of the words acute or grave musicians commonly use the terms sharp or flat, and sometimes high or low, not that any of these names can be supposed to have a resemblance to the real properties of sound, but merely for the sake of distinction.—The second property we may remark, is, their time or proportional continuance: And here we observe, that without varying the acuteness or gravity of the tone, a difference of movement alone may constitute an imperfect species of music, such for example is that of the drum; where the tones are only diversified by the celerity with which they succeed each other.—The principal distinctions then of musical sounds, are *time* and *tune*, and to the happy combination of these two qualities, is chiefly to be ascribed the pleasing and endless variety of the musical art.”

## CHAPTER II.

## Of Tune.

*Article first.* THE interval between a man's and woman's voice, is called an Octave, or Eighth; and this interval is naturally divided into seven smaller intervals; five of which are called tones, and two of them semi or half tones\*.

*Article second.* The sounds naturally succeed each other ascending, from the first to the second a tone, second to the third a tone, third to the fourth half a tone, fourth to the fifth a tone, fifth to the sixth a tone, sixth to the seventh a tone, seventh to the eighth a half tone. Wherefore this order of tones and half tones is called the natural scale of music.

*Article third.* The key note is called the standard of tune, because it governs and explains all the rest: It is the predominant tone to which all the others have a re-

\* Nicer distinctions of musical intervals are found by mathematical calculations—(See Essay on Tune, or Holden's harmonical Arithmetic, page 126.)

ference, and is generally the confounding note of the principal part, and always that of the *Bass*.

*Article fourth.* When reckoning from the key note, if the semitones lie between the third and fourth and seventh and eighth, as in the natural scale, the *Mode* is major, and the air cheerful: But if the semitones lie between the second and third, fifth and sixth, as when reckoning from the sixth of the natural scale, to its octave, the *Mode* is minor; and the air plaintive.

*Article fifth.* Twenty-two sounds, or three octaves, is the ordinary compass of the human voice, and to express these fixed sounds, we use the seven first letters of the alphabet. See the following scheme:

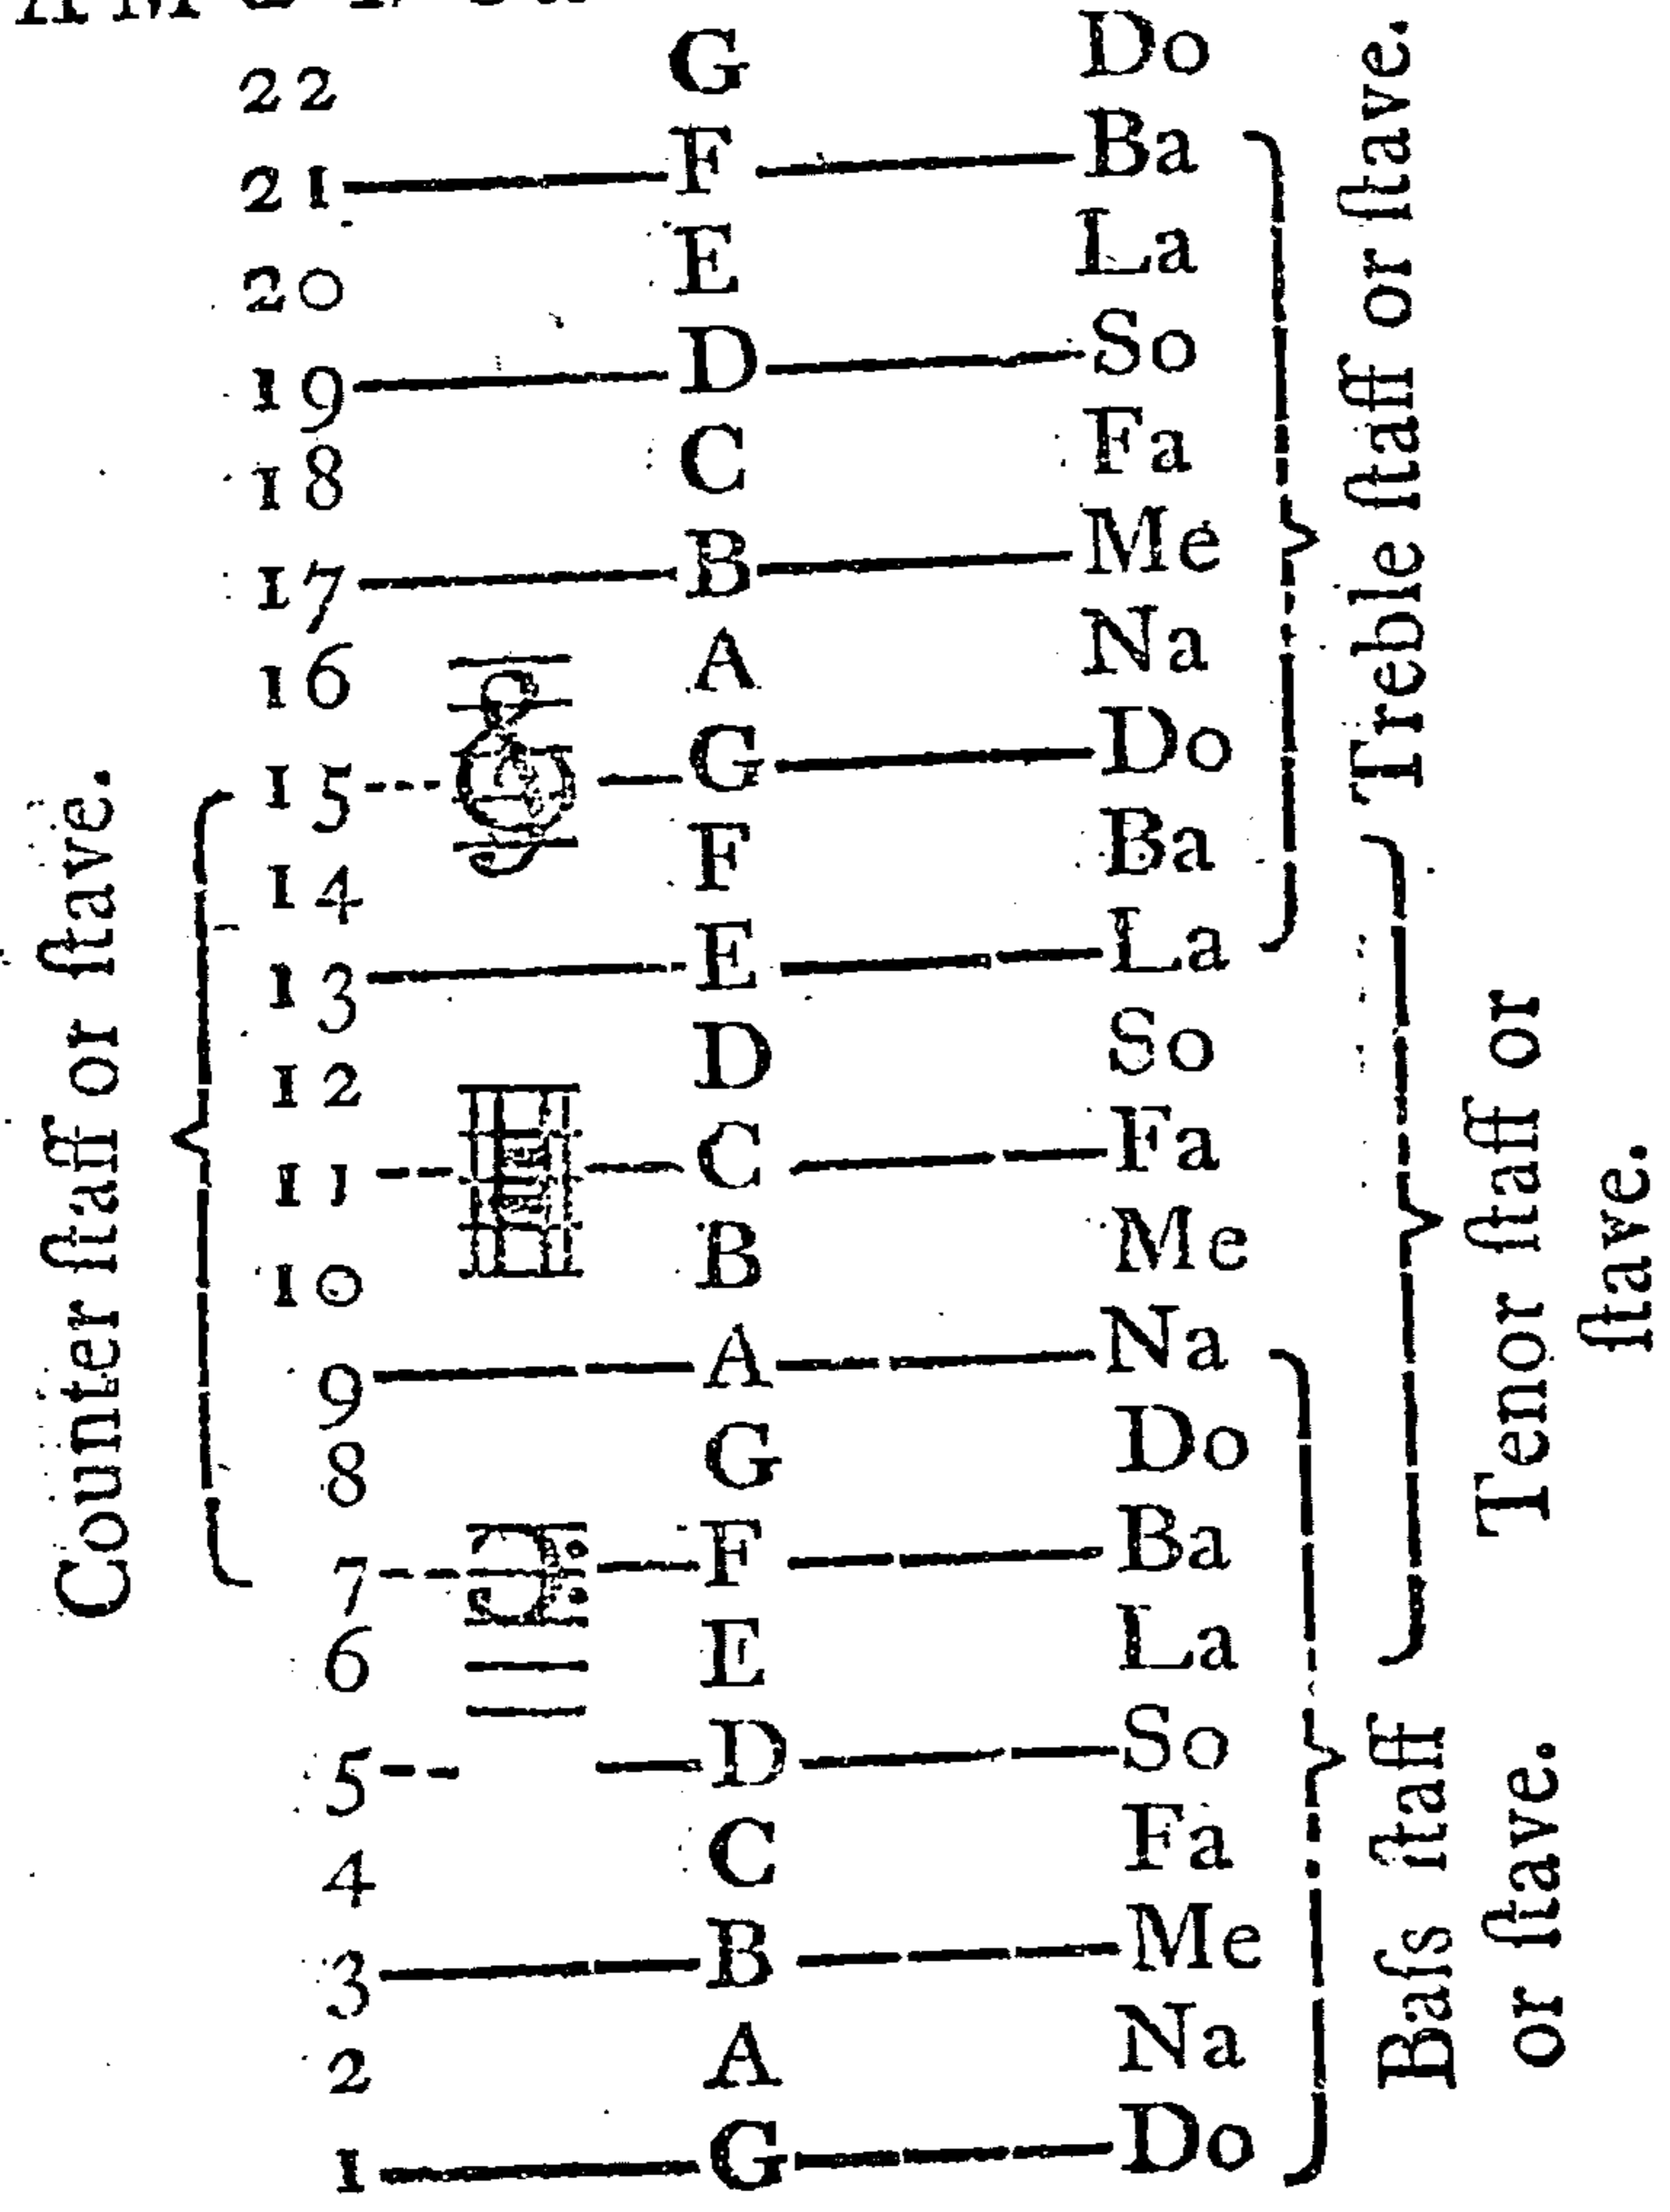

G\* A\* BC\* D\* EF\* G\* A\* BC\* D\* EF\* G\* A\* BC\* D\* EF\* G

The first letter G on the left hand represents the lowest sound which a man of a tolerable voice can clearly form; and the last G on the right hand the highest sound that a woman of a tolerable voice can clearly form.—We suppose that each interval of a tone, may be divided into two artificial semitones, as is denoted by the asterisk, in the above scheme, and thus instead of five tones and two

semitones, we shall have a system of twelve semitones in an octave. The asterisk may be considered as a semitone above the letter it follows, or a semitone below the letter which follows it, and those letters that are naturally semitone intervals, have no asterisk between them.

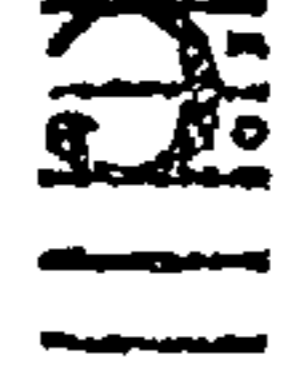

*Article sixth.* Our music is written upon five parallel lines, and their intermediate spaces; but a general scale of eleven lines with their spaces, is formed to express the whole compass of the voice, viz. twenty-two sounds. This scale is called the *Gamut*. See following example:

GAMUT OR GENERAL SCALE.

Three octaves being more than a common voice can perform, we therefore assign the bass staff to the gravest voices of men, and the tenor staff to the highest of men's voices, counter staff to boy's voices, or the lowest voices of women, and the treble staff to the highest voices of women.

A Cliff is a character placed at the beginning of a staff, to shew what sound of the general scale it represents.

This character  is called the F Cliff, the line that passes between its dots, has the seventh sound of the general scale. It is used only in the bass.

This character  is called the C Cliff, the line that passes between its cross strokes, has the eleventh sound of the general scale. This cliff is now used only in the counter, but was formerly used in all parts but the bass.

This character  is called the G Cliff, the line that cuts it in three places, has the fifteenth sound of the ge-

In the above table, the figures in the first column, on the left hand, shew the number of the sharps or flats that are used in the different keys. The second column shews the letters that are sharped or flatted. The third column, shews the letter that is the major key note; the fourth column, that which is the minor key note; and the fifth, the letter that is fa.

Example: Let G be a major key note, or E a minor key note, look in the third and fourth columns, and find those letters the second from the top, and in the left hand column on the same line the figure 1 is found, denoting that we must sharp one letter; in the second column we find the letter that ought to be sharped, viz. F, and in the fifth column, on the same line, we find that G is fa.

*Article seventh.* In practising musical lessons, for the voice, it is of great service to apply, invariably, particular syllables, to the intervals of the octave, as by that means, we associate with each syllable, the idea of its proper sound. The following syllables,

fa,	fo,	la,	ba,	do,	na,	me,
hall,	note,	hall,	hate,	note,	hall,	beer,
1,	2,	3,	4,	5,	6,	7,

E

are applied to the sounds of music with great success. Fa to the key note, of the major mode, or the gravest sound in the natural scale, and na to the key note, of the minor mode, or the sixth in the natural scale, and the other syllables, to the other sounds in the order, as above.—(See these syllables applied to the natural keys in the Gamut, article sixth). The vowels, in the above syllables, must be sounded in the same manner, as in the words set under them. If a sharp comes before any particular note, that is not found at the cliff, we change its vowel into E, and give it the sound of E in me; as long as that sound is affected by the accidental sharp: the same alteration takes place, when a note that is flat, at the cliff, has a natural set before it, sometime after the beginning of the tune, and when me has an accidental flat or natural set before it, we may change E into A, sounded as in hall.

fe fe be de

Examples: Fa x fo x la ba x do x &c.

\* This method of solfaing, has many advantages above the old British mode of repeating the same syllable with every fourth note—or repeating fa, sol, la, twice above the mi—which, in a great measure, destroys the use of singing syllables, for they do not always

## CHAPTER III.

## Of Time.

*Article ninth.* **M**USIC is naturally divided into small equal parts, called measures †.

mean the same sound, fa is at one time a key note, and at another, the fourth of the key note in the same mode, sol is the second and fifth of the same mode, la is the third and sixth of the same mode, and mi is the only syllable that does not occur twice in an octave. And thus we may see that every syllable, except mi, has a double meaning, and of consequence, is the cause of much perplexity to the pupil; for set a learner to sing at first sight, after he has made a tolerable degree of proficiency, and if he is sounding sol, the second of the major mode, and fa the fourth follows it, he will descend to fa the key note, instead of rising, as he ought to do, to the fourth—and in the other syllables he will be liable to the same mistake in a greater or less degree.

And what is still worse, there is no provision made for the accidental sharps or flats, for he at one instant must sound sol a tone above fa, and immediately upon it give a sound a tone and a half above fa, by sharpening sol, and still calling it by the same name. This is confusion to the learner, and perplexity to the master; and often destroys the beauty of the composition. It is to remedy those great inconveniencies, that the British mode is totally rejected, and the above adopted in the Uranian Academy of this city.

† “The division of music into equal timed measures, answers exactly to the division of poetry into feet.”

Accent is a certain force of the voice upon particular parts of a measure. When the measure is naturally subdivided into two, four, eight, sixteen, or thirty-two parts, the time is common; and when the measure is naturally subdivided into three parts, or three continually bisected, the time is triple. The three first moods of common time, and the triple time moods, have two accents in a measure; *i. e.* if a measure in common time, be divided into four crotchets, the first and third is accented; or if a measure, in triple time, be subdivided into three equal parts, the first and third is accented; the fourth mood of common time, has only one accent in a measure; compound time is subdivided into six equal parts, and has the accent on the first and fourth.

The first accent in a measure is the strongest; the second is weak, and in very quick movements, is hardly perceivable; for an example of the several moods of time, with their proportionate duration, see chapter fourth.

We must not omit to notice, that the same mood does not always express the same degree of quickness, in different tunes, but is often varied by Italian or other words set over or under the mood of time. (See those words at the end of this chapter.)

Beating of time, is an artificial method of marking the movement of a musical air, is performed in various ways, but generally with the hand or foot; in performing *vocal music* alone, it is best to use the motion of the hand only.

Every measure begins with a motion of the hand, or foot, downwards, except in very quick instrumental music, where the motion is down with the beginning of one measure, and up with the next, &c.

In beating the two first moods of common time, let the first beat begin with a motion of the hand downwards, resting the hand upon the end of the fingers, on the thing beat upon; the second beat begins with a motion of the heel of the hand downwards, and resting in that position without raising the fingers; for the third beat, the hand may be raised to the left shoulder; for the fourth, let the hand be brought back to its first position, and then it will be ready to begin another measure—the two first beats in triple time may be performed as the two first in common time; for the third beat, raise the hand to its first position. For the sake of uniformity it is best for the whole choir to beat with the right hand.

We may consider the motion and resting of the hand as dividing the beat equally, in common and tri-

ple time; but in compound time the resting is double of the motion.

*Examples of Common Time.*

1 2 3 4      1 2      1 2  
m r, m r, m r, m r.    m r, m r,    m r, m r.

d    d    u, u,      d, u,      d, u:

*Triple Time.*

1 2 3      1 2 3      1 2  
m r, m r, m r,    m r, m r, m r,    m r, m r, m r.

d,    d, u.      d,    d, u.      d,    d, u.

*Compound Time.*

1      2      1      2  
m r r,    m r r,      m r r,    m r r,

d,      u.      d,      u.

In the above examples the figures shew the number of beats to a measure, the letters *m* and *r*, the motion and resting of each beat, and the letters *d* and *u* show the beat to be down or up \*.

Notes of Syncopation are those that are continued through the bar, or out of the common order in the measure, and require the accent out of its usual place.

Examples :

ITALIAN WORDS frequently used in Music.

The degrees of time are often expressed by the words *Adagio*, very slow. *Largo*, slow. *Andante*, moderately slow. *Allegro*, quick. *Presto*, very quick. *Prestissimo*, most quick.

\* There should not be the least noise in beating of time, or in any other way, during the performance of music, as it has a direct tendency to destroy the musical sounds, and to substitute confusion.

Other terms common in use are,

*Affetuoso*, tender, affecting.

*Bis*, twice, *i. e.* repeat the passage.

*Chorus*, full harmony of all the parts.

*Crescendo*, increasing in sound.

*Da Capo*, begin again, and end with first strain.

*Diminuendo*, gradually diminishing in sound.

*Dolce*, sweet.

*Forte*, or *F.* loud.

*Fortissimo*, very loud.

*Fuge*, when the parts succeed in imitation of each other.

*Piano*, or *P.* soft opposed to *Forte*.

*Pianissimo*, very soft.

*Recitativo*, a stile of music which resembles speaking.

*Solo*, one part only.

*Symphony*, instrumental music preceeding or following the vocal.

*Tutti*, all—see *Chorus*.

*Verse*, one finger to a part.

*Vivace*, with life.

*Volti*, turn over.

*Volti subito*, turn over quickly.

C H A P T E R IV.

**I**N music there are but seven sounds belonging to any key note. And they are distinguished by the seven first letters of the alphabet, A, B, C, D, E, F, G.

A staff is five lines with their spaces, whereon music is written, to express the gradations of sound.

E X A M P L E S.

BASS.		TENOR.		COUNTER.		TREBLE.	
Fifth line ————— A	9	Space above G	15	Fifth line ————— G	15	Space above G	22
Fourth space G	8	Fifth line ————— F	14	Fourth space F	14	Fifth line ————— F	21
Fourth line ————— F	7	Fourth space E	13	Fourth line ————— E	13	Fourth space E	20
Third space E	6	Fourth line ————— D	12	Third space D	12	Fourth line ————— D	19
Third line ————— D	5	Third space C	11	Third line ————— C	11	Third space C	18
Second space C	4	Third line ————— B	10	Second space B	10	Third line ————— B	17
Second line ————— B	3	Second space A	9	Second line ————— A	9	Second space A	16
First space A	2	Second line ————— G	8	First space G	8	Second line ————— G	15
First line ————— G	1	First space F	7	First line ————— F	7	First space F	14
		First line ————— E	6			First line ————— E	13

In the above examples the figures on the right of each, discover the corresponding sounds of the general scale, and likewise the pitch of the several parts together. (See Gamut).

A flat  $\flat$  set before a note sinks it half a tone.

A sharp  $\sharp$  raises it half a tone.

A natural  $\natural$  restores a note to its primitive sound.

Order of the singing syllables, ascending, is fa, so, la, ba, do, na, me, fa. Descending, fa, me, na, do, ba, la, so, fa.

If no flat or sharp, is at the beginning of a tune, C is Fa,

If F be sharp,	-	G is Fa.
If F and C be sharp,	-	D is Fa.
If F C and G be sharp,	-	A is Fa.
If F C G and D be sharp,	-	E is Fa.

If B be flat,	-	F is Fa.
If B and E be flat,	-	B is Fa.
If B E and A be flat,	-	E is Fa.
If B E A and D be flat,	-	A is Fa.

The last note of the bass must always be Fa, or Na, if Fa, the tune is in the major mode, if Na, it is in the minor mode.

A Brace,  $\{$  or  $\parallel$ , shows how many parts are sung together.

A Ledger—Line is added when a note ascends or descends a line beyond the stave.

A Slur  $\frown$  shows how many notes are sung to one syllable.

A Single  $\text{T}$  Bar divides the tune agreeably to the measure.

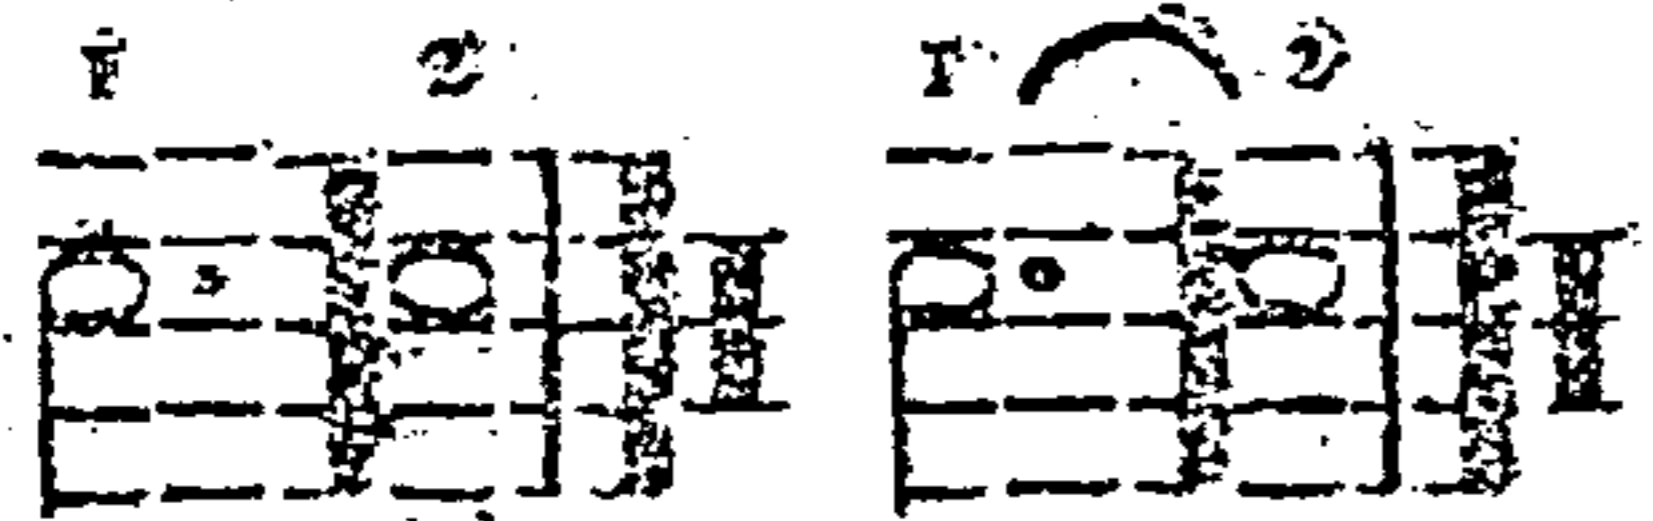

A Double  $\text{T}$  Bar shews the end of a strain.

A Dot . at the right hand of a note, makes it one half longer.

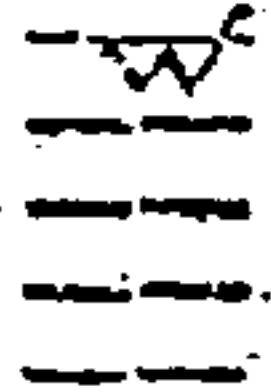

A Staccato  $\text{T}$  shows that the note thus marked must be sung in a very distinct manner.

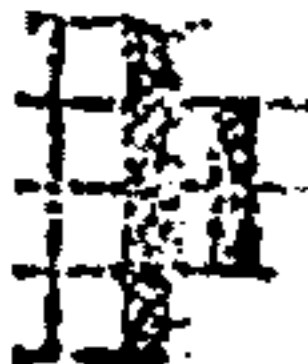

A Repeat :S: or  $\text{T}$  shows that the tune is to be sung twice from the note over, or before, which it is placed to the next double bar or close.

A figure three  $\text{T}$  over or under any three notes of the same kind, shows that they must be performed in the time of two without a figure.

The figures one two  at the end of a

strain, that is repeated, show that the note under one, is to be sung before the repeat, and that under two, after, omitting the note under one, but if tied with a slur, both must be sung in the repetition.

A Direct  is set at the end of a staff, to shew the place of the first note upon the following staff.

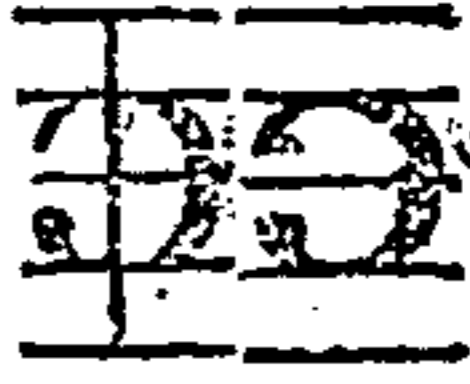

A Close  shows the end of a tune.

*Moods of Common Time.*

*First Mood*, is expressed by a plain , has a semi-breve or its quantity, in a measure; sung in the time of four seconds, or while we may leisurely count, one, two, three, four; four beats in a bar, two down, and two up.

*Second Mood*, is expressed by a  with a stroke thro'

it, has the same measure, sung in the time of three seconds, four beats in a bar, two down and two up.

*Third Mood*, is expressed by a , inverted, has the same measure, sung in the time of two seconds, two beats in a bar, one down, and one up.

*Fourth Mood*, is expressed by the figures  $\frac{2}{4}$  two four, has a minim for its measure, sung in the time of one second, two beats in a bar, one down and one up.

*Moods of Triple Time.*

*First Mood*, is expressed by the figures , three and two, has three minims in a measure, sung in the time of three seconds, three beats in a bar, two down one up.

*Second Mood*, is expressed by the figures , three and four, has three crotchets in a measure, sung in half the time of the first mood, three beats in a bar, two down, and one up.

*Third Mood*, is expressed by the figures  $\frac{3}{8}$  three and eight, has three quavers in a measure, fung in half the time of the second mood, three beats in a bar, two down and one up.

*Moods of Compound Time.*

*First Mood*, is expressed by the figure  $\frac{6}{4}$  six and four, has six crotchets in a measure, fung in the time of two seconds, two beats in a bar, one down and one up.

*Second Mood*, is expressed by the figures  $\frac{6}{8}$  six and eight, has six quavers in a measure, fung in the time of one second, two beats in a bar, one down and one up.

In the moods of time that are expressed by figures, we may observe that the under figure shows into how many parts the semibreve is divided, and the upper figure how many of the same parts fill a measure.

Marks of SOUND or SILENCE.

Sound. Silence or Rests.

Semibreve

- - -

Minims

- - -

Crotchets

- - -

Quavers

- - -

Semiquavers

- - -

Demifemiquavers

- - -

RESTS of several BARS.

A semibreve rest fills a measure in all moods of time;

the other rests are equal in time to the notes after which they are called.

One semibreve is equal, in duration, to two minims, or four crotchets, or eight quavers, or sixteen semi-quavers, or thirty-two demisemiquavers.

Lessons for Tuning the Voice.

*Hymn for Middletown, (p. 41).*

2. Him, though highest heav'n receives,  
Still he loves the earth he leaves;  
Though returning to his throne,  
Still he calls mankind his own:  
Still for us he intercedes,  
Prevalent his death he pleads;  
Next himself prepares our place,  
Harbinger of human race.
3. Master (may we ever say)  
Taken from our head to-day;  
See thy faithful servants, see,  
Ever gazing up to thee!  
Grant, though parted from our sight,  
High above yon azure height,  
Grant our hearts may thither rise,  
Following thee beyond the skies.

4. Ever upward let us move,  
Wafted on the wings of love;  
Looking when our Lord shall come,  
Longing, gasping after home:  
There we shall with thee remain,  
Partners of thine endless reign;  
There thy face unclouded see,  
Find our heav'n, of heav'ns in thee.

*Hymn for 149. (p. 44).*

2. Let praise to the God who made us ascend;  
Let each grateful heart exult in its King;  
For God whom we worship our songs will attend,  
And view with complacence the off'ring we bring.
3. Be joyful, ye saints, sustain'd by his might,  
And let your glad songs awake with each morn;  
For those who obey him are still his delight;  
His hand with salvation the meek shall adorn.

4. Then praise ye the Lord, prepare a new song;  
And let all his faints in the full concert join;  
With voices united the anthem prolong,  
And shew forth his honours in music divine.

4. Grace is a sacred plant of heav'nly birth;  
The seed descending from above,  
Roots in a soil refin'd, grows high on earth,  
And blooms with life, and joy, and love.

*Hymn for Sophronia. (p. 53).*

2. Deep from my soul, mark how the sob's arise,  
Hear the long groans that waste my breath,  
And read the mighty sorrow in my eyes,  
Lovely Sophronia sleeps in death.

5. Not the gay splendors of a flatt'ring court,  
Could tempt her to appear and shine:  
Her solemn airs forbid the world's resort;  
But I was blest, and she was mine.

3. I was all love, and she was all delight,  
Let me run back to seasons past;  
Ah! flow'ry days when she charm'd my sight,  
But roses will not always last.

6. She was my guide, my friend, my earthly all;  
Love grew with ev'ry waning moon;-  
Had Heav'n a length of years delay'd its call,  
Still I had thought it called too soon.

7. But peace, my sorrows! nor with murmuring voice,  
Dare to accuse Heav'n's high decree:  
She was first ripe for everlasting joys;  
Sophron, she waits above for thee.

praises of my God shall fill

*Little Handbore. No. 11. Williams.*

Lord what a feeble piece, Is this our mortal frame, Our life how poor a trifle 'tis, That scarce deserve the name.

*No. Thomas's. No. 11. Williams.*

Let every creature join To praise th' eternal God Ye heavenly hosts the song begin And sound his name abroad

*Suffield. C. M.*

*King*

The first system of music consists of two staves. The upper staff begins with a treble clef and a common time signature. The lower staff begins with a bass clef and a common time signature. Both staves contain a series of notes, including quarter and eighth notes, with some notes beamed together. There are also rests and repeat signs throughout the system.

Teach me the measure of my days Thou maker of my frame I would survey life's narrow space And learn how frail I am.

The second system of music consists of two staves, continuing the melody and accompaniment from the first system. It features similar note values and rests, with some notes marked with an 'x'.

*Handish. C. M.*

The third system of music consists of two staves. The upper staff begins with a treble clef and a common time signature. The lower staff begins with a bass clef and a common time signature. The notation is simpler, primarily using quarter notes and rests.

How shall the Young secure their hearts And guard their lives from sin Thy word the choicest rules imparts To keep the conscience clean

The fourth system of music consists of two staves, continuing the melody and accompaniment. It features a mix of quarter and eighth notes with rests.

Bridgewater: L. M. C. Olson.

Shew pity Lord O Lord forgive let a repenting rebel live Are not thy mercies large and free May not a sinner trust in thee.

Brunswick. I. II.

To thee O God my cries ascend O haste to my relief And with accustomed pity hear The accents of my grief.

Rochester. C. H.

Williams. 7

Two staves of musical notation. The top staff begins with a treble clef and a key signature of one sharp (F#). The bottom staff begins with an alto clef and the same key signature. Both staves contain a melody of quarter and eighth notes, with some notes beamed together. The music concludes with a double bar line.

Joy to the world the Lord is come Let earth receive her king let evry heart prepare him room And heav'n and nature sing.

Two staves of musical notation, continuing the melody from the first part. The notation is consistent with the previous staves, featuring a treble and alto clef with a one-sharp key signature. The melody continues with similar rhythmic patterns and concludes with a double bar line.

Bath. I. H.

Williams.

Two staves of musical notation. The top staff begins with a treble clef and a key signature of one sharp (F#). The bottom staff begins with an alto clef and the same key signature. The melody consists of quarter notes and rests, with some notes beamed together. It concludes with a double bar line.

Thrice happy man who fears the Lord Loves his commands & trusts his word Honour & peace his days attend & Blessings to his seed descend

Two staves of musical notation, continuing the melody from the first part. The notation is consistent with the previous staves, featuring a treble and alto clef with a one-sharp key signature. The melody continues with quarter notes and rests, concluding with a double bar line.

Watts L. M. Williams

Life is the time to serve the Lord The time to insure the great reward And while the lamp holds out to burn The vilest sinner may return

Wylestrury S. M. Williams.

And must this Body die This mortal frame decay And must these active limbs of mine Lie mouldering in the clay

*Virginia. C. II.*

Thy words the raging winds controul, And rule ev' boistrous deep: Thou mak'st v' sleeping billows roll, The rolling billows sleep The &c.

*Wantage. C. II.*

With reverence let the faints appear, And bow before the Lord, His high commands with reverence hear, And tremble at his word.

Ye boundless realms of joy tis all your

The first system of the musical score consists of four staves. The top two staves contain the vocal line with lyrics. The bottom two staves contain the instrumental accompaniment. The lyrics are: "men astonish'd mount the skies & sink in gaping graves. 2" and "Ye boundless realms of joy tis all your". The music is written in a historical style with various note values and rests.

maker stame His praise your souls employ Above the tarry frame Your voice raise e chording  
plum of his praise

The second system of the musical score also consists of four staves. The top two staves contain the vocal line with lyrics. The bottom two staves contain the instrumental accompaniment. The lyrics are: "maker stame His praise your souls employ Above the tarry frame Your voice raise e chording" and "plum of his praise". The music continues with similar notation to the first system.

The first system of music features a treble clef on the left. It consists of two staves: the upper staff is a treble clef staff, and the lower staff is a bass clef staff. The music is written in a common time signature (C) and contains several measures of notes, including quarter and eighth notes.

Lord of the worlds above How pleasant & how fair, The dwellings of thy love Thine earthly temples are

The second system of music continues the melody from the first system, maintaining the same clefs and time signature. It consists of two staves with musical notation.

The third system of music includes a treble clef and a grand staff. The lower staff contains the text "To & c" written below the notes. The music continues with two staves.

To thine abode My heart aspires With warm desires To see my God

The fourth system of music includes a treble clef and a grand staff. The lower staff contains the text "To & c" written below the notes. The music concludes with two staves.
